# Online Reporting Tool

# Online Reporting Tool

## Live analysis for up-to-date reports

Being able to access and analyse the live results of a project is vital for any researcher. Research Now's Online Reporting Tool enables you to generate cross tabular reports for your projects whenever you wish.

All you need to do is login to our web portal and build tailored reports yourself whenever you need, so why not try it now?

## How does it work?

Once you have logged in and selected the project you want to analyse, you are a few clicks away from building your own report. Our tool is user-friendly and will allow you to easily build your own reports containing all the latest available data. Reports will be shown as tables or graphs and you will also be able to download them into Excel and PowerPoint to adapt or re-use later.

Research Now's Online Reporting Tool is available not only for ad-hoc surveys, but for tracking studies and other continuous surveys as well. Once your reports are set up, they will be updated wave on wave with new data allowing comparison between waves of data and offering further analysis possibilities. This process will save you time along the way.

## What features does Research Now's Online Reporting Tool offer?

It offers a wide range of features to choose from so you can create a report tailored to your specific requirements.

### Reporting features

- Topline results
- Simple cross tables
- Interlocking cross breaks (e.g. age by gender - male/18-24)
